Cloud Security Gateway

**Maximum cloud security
and performance**

genua.

Cloud Enabler

Highly secure protection of data and applications
in the cloud

Use the Efficiency of the Cloud Securely

Work more efficiently, reduce costs, react quickly to meet
new requirements – you want to use the advantages of
the cloud but still have concerns about security? With our
virtual Cloud Security Gateway, you can use this techno-
logy with confidence.

- The gateway is positioned at the highly sensitive
  cloud-Internet interface and monitors all data traffic

- Most importantly, the content of the data stream is
  analyzed at the application level

You achieve a uniquely high level of IT security for your
data and applications in the cloud.

All Advantages at a Glance

Complete content check

Based on the certified and
approved genugate firewall

Security technology with the
highest degree of maturity

Any number of
gateway instances

Low administrative effort

Maximum security at the
cloud-Internet interface

## Thorough Inspection of Data Contents

The virtual gateway is based on the application level gateway of the High Resistance Firewall genugate, which enables a complete analysis of the data stream.

To precisely inspect all protocols from layer 3 to deep into the application, the Cloud Security Gateway is equipped with high-quality inspection software. Unwanted content and dangerous malicious software can thereby be reliably detected and blocked.

Content Analysis Makes the Difference

During the content inspection of the data, the virtual gateway goes beyond solutions such as packet filters and so-called next generation firewalls, which only check formal criteria or random samples of the content.

Because of the technical relationship to genugate, you receive high-quality security technology: genugate's high level of protection is confirmed by the German Federal Office for Information Security (BSI) through certifications according to the Standard Common Criteria at the strict EAL 4+ level. The uniquely high resistance against direct attacks is noted during these certifications.
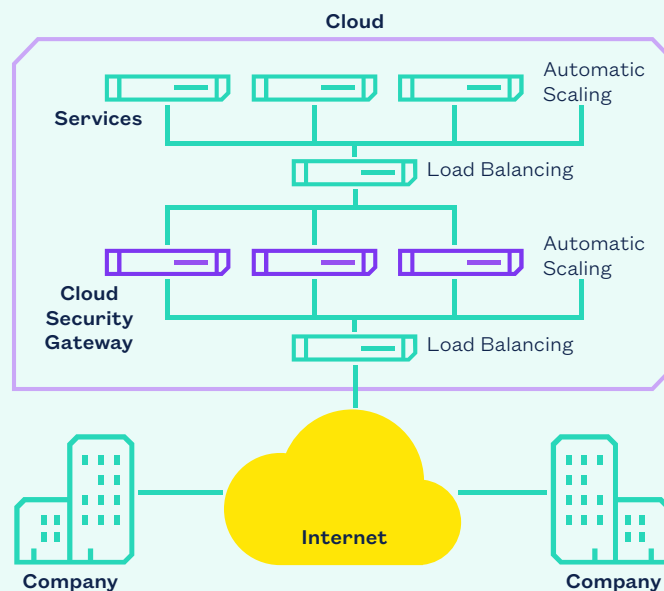

Cloud Security Gateway in any number of instances

Reasons Why

- Experts for the IT security of companies and public organizations

- Offer of a comprehensive, modular IT security portfolio

- Quality without compromise for all products, services, and processes

genua – Excellence in Digital Security

genua develops innovative, reliable as well as market-shaping products and solutions. Whether in the public sector, for the operators of critical infrastructures, in industry or in the protection of classified information: we provide answers to the IT security challenges of today and of tomorrow.
